SUMMARY

Hi, I'm Prathamesh Naik, a passionate designer and developer specializing in web development and data analysis. My goal is to create impactful solutions that enhance user experience and drive results. I love transforming ideas into impactful creations that connect and inspire. Outside of work, I enjoy exploring new places, learning new skills and capturing life's moments.

PROJECTS

PasteApp

📅 10/2024 - 10/2024

🔗 <https://paste-app-prathamesh-naiks-projects.vercel.app/>

PasteApp is a simple and efficient clipboard manager designed for anyone who frequently works with copied text. With PasteApp, you can save and organize your clipboard history in a streamlined interface, making it easy to revisit and reuse previous entries. Perfect for developers, writers, and busy professionals, the app helps prevent data loss and improves productivity. Just copy, save, share and access all your past snippets whenever you need them. Give it a try at PasteApp!

TinDog

📅 08/2024 - 08/2024

🔗 <https://naik-prathamesh.github.io/Tindog-project/>

The TinDog project is a humorous and creative web application inspired by Tinder but designed for dog matchmaking. It offers features like location-based and breed-specific matching, instant messaging, verified profiles, and secure data protection. Pricing plans cater to various needs, including a free tier and premium options. It utilizes a clean, modern design with Bootstrap, making it visually appealing and user-friendly. Testimonials highlight the app's impact in helping dog owners find companions for their pets.
